READER'S **Recipe**

PARMESAN CRUSTED CHICKEN

1/2 cup unseasoned bread crumbs
1/4 cup shredded Parmesan cheese
2 Tbsp. Hidden Valley® Original Ranch® Seasoning

2 large eggs, lightly beaten
4 boneless, skinless chicken breasts (approximately 4-5 ounces each)

Preheat oven to 400°.
In a small bowl, combine bread crumbs, Parmesan and Hidden Valley® Original Ranch® Seasoning. Stir until combined.
Place lightly beaten eggs in a small bowl. Dip each breast into the egg, shaking off any excess, and then dip into the dressing mixture, turning to coat on all sides.
Place coated breasts onto a greased baking dish in a single layer. Bake for 25-30 min. until an internal temperature of 165°F or until juices run clear.

Turn Your Yard Into A Vacation-Worthy Oasis

Warm weather means more time to relax outdoors. For those homeowners lucky enough to have entertaining spaces outside, spring and summer provides plenty of opportunities to enjoy fresh air under the sun or stars. Over the last few years, families have become especially familiar with what works about their yards and where there is room for improvement. Pandemic-related travel restrictions and early stay-at-home mandates resulted in plenty of time spent in backyards on staycations. Even though many such restrictions have been lifted, homeowners may have seen the benefits of having functional respites right outside their doors. Large or small, here are ways to make an outdoor oasis at home.

CREATE LIVING PRIVACY
Living in close proximity to neighbors may make privacy harder to come by. Wood or vinyl fences, however effective, may not provide the all-natural look many people desire. Vertical gardening, which trains easy-care vines like English ivy, Clematis or various climbing roses to grow on trellis or fencing adds greenery and privacy. Hedges and fast-growing shrubs also can be used for natural barriers.

INSTALL A POOL - Pools are the ultimate spots to cool off on hot days. An elaborately shaped inground pool can blend in with the landscape and offer the ultimate hang-out zone. However, above-ground pools also serve the purpose and are more budget-friendly. Stock tank pools are popular among those who want minimal pool expenditure or have small spaces to work with. Stock tanks are metal vessels traditionally used as watering holes for livestock. They also can be "adult kiddie pools" when combined with some plumbing. Galvanized steel frames make them sturdy. With floats and other accessories, they can become the perfect oasis.

PROVIDE OUTDOOR ATMOSPHERE - Create a bespoke bistro vibe by using freestanding planters and posts along with hanging lights to make an intimate outdoor hangout spot at night. For those with permanent structures, like a deck or a gazebo, lights can be strung across the area or on railings or edging.

EXTEND THE LIVING SPACE - Decks and patios can help make outdoor entertaining areas more comfortable by eliminating the need to sit on the grass or gravel. Plus, they add another "room" to the home. When paired with weatherproof patio furniture, such as sofas, loungers and tables, a private seating area can be crafted and utilized for any number of entertaining desires.

HANG A HAMMOCK - Few things evoke feelings of relaxation better than a hammock. Fitted between two trees (or two posts if trees are sparse), a hammock is an ideal place to grab a nap or read a book. Additional oasis-inspired ideas include outdoor kitchens, letting up lanterns, cascading water features, and bird feeders to attract the sounds of nature.

Vegetable and Flower Plants

Come Out To The Farm & See All We Have!

Homeowners enjoy gardening for many different reasons. In addition to adding beauty to a property, gardens can offset grocery costs by yielding tasty produce. They also offer important habitats and food sources for both insects and animals. While growing a vegetable or flower garden can turn into a rewarding hobby, or even a passion, gardening also can be overwhelming, particularly when the results are less than stellar. Novice gardeners have scores of resources at their disposal, including the advice of gardeners who have made mistakes and learned from them. The following guidance can make home gardens that much more successful.

START SMALL - You may have visions of an expansive garden growing rows of crops or acres of flowers. But it is smart to start small and build on what you find successful, which includes plants that thrive in your lawn and garden. This also is beneficial if you are unsure of vegetable yields. Several blooming plants produc-

6 Ways To Make Your Garden More Successful

ing bushels of crops can be overwhelming, especially if you can't get to harvesting or cooking them in a timely fashion.

ASSESS THE SOIL - Plants need nutrient-rich soil to encourage extensive root systems and produce strong, hardy plants, according to the gardening resource GrowVeg. Nourish soil with organic matter, such as manure, compost, shredded leaves, and natural mulch. Add this organic matter in the off-season to give it enough time to be incorporated into the ground before spring. You can have your soil tested for pH and other characteristics that make it friendly or averse to plants at a local garden center.

ARM YOURSELF WITH KNOWLEDGE - Do you know how deeply to plant seeds and how far apart to space plants? Are you aware of the sunlight needs of certain flowers or plants? If not, read the packaging and do your research so your plants have the best chance of not only sprouting, but also surviving. Many people prefer to start seedlings indoors in

late winter and then transfer those plants outdoors when they are stronger and more established.

SIT IN YOUR YARD AND OBSERVE - Watch the way the sunlight dances over areas of your landscape. Take note of which areas get the most sun and shade. This will help you plan what to plant and where to plant it. Vegetable gardens tend to need ample sunlight to bear pick-worthy produce. You can give plants a leg up by growing them in optimal conditions.

CHOOSE HARDY VARIETIES - Certain plants have been bred to thrive in your climate, including

heat-tolerant plants for climates with sweltering summer sun. Consult with a local gardening center to figure out which plant zone you are in and which plants will do best within that zone.

USE RAINWATER - Rainwater contains fewer contaminants and additives than tap water, which can benefit garden plants. Collect rainwater in rain barrels and use irrigation systems to deliver it to the garden. Home gardens can yield many gifts, from flowers to fruit. Beginners can utilize some time-tested strategies to increase their chances of planting a successful garden.

Popular Insect Repellent Plants

Homeowners choose plants for their properties based on a number of variables. Some may be into growing their own foods, while others desire their gardens to be an awe-inspiring mélange of bright colors and alluring scents. There's no wrong reason to plant a fresh garden, but some plants offer extra benefits, such as repelling insects. Insects can be a nuisance and a threat to individuals' overall health. According to the American Academy of Family Physicians, insect-borne diseases are viral and bacterial illnesses that develop from insect bites. Mosquitoes, sand flies and fleas are some examples of insects that can pass on disease. Fever, chills, headache, and muscle soreness are just a few of the more common symptoms linked to insect-borne diseases.

The good news for avid gardeners is that certain plants can help repel insects and provide the additional benefits like fresh food and aesthetic appeal that so many people love.

• **BASIL:** The aroma of fresh basil is enough to compel any gardener to make a place for it in their garden. But there's more to fresh basil than its scent, as the Farmers Almanac notes it can be used to repel mosquitoes and moths.

• **LAVENDER:** Fleas, flies, mosquitoes, and moths are not fans of this aromatic and colorful member of the mint family. Bees tend to be drawn to lavender, a durable plant that many garden centers recommend in areas prone to drought or hot summers without much precipitation.

• **MINT:** Mint is another plant that is instantly recognizable for its aroma. But mint lovers may not realize that it's also great for keeping ants at bay. Mint also can be used to repel mosquitoes, but gardeners with no experience planting mint should plant it in pots. That's because the Farmers Almanac notes mint is an especially aggressive spreader that can quickly take over a garden. Separating mint in pots can prevent it from bullying its way into other plants' domains.

• **LEMONGRASS:** Lemongrass is a tropical grass that's so fragrant it's often used in perfumes. Lemongrass contains citronella, which many people associate with repelling mosquitoes. A potted lemongrass plant can repel these unwanted guests, keeping them away from decks, porches and/or patios all summer long.

• **CHRYSANTHEMUMS:** The Farmers' Almanac® recommends using chrysanthemums, which repel a range of insects from bedbugs to fleas to ants, as border plants around a home. That's because they contain the natural insecticide pyrethrin, which can serve as something of an insect-repelling boundary around a home. Insects are unwanted guests around a home each spring, summer and fall. Certain plants can help repel insects and serve as an eco-friendly alternative to insecticides.
